FIBERCOMBI
ANIMAL HEALTH AND WELFARE

We also apply the FiberCombi especially for litters with diarrhoea as it is very efficient to keep the piglets dry.

Besides that, we also use FiberCombi for weaners, (...) to keep a good hygiene and to prevent diarrhoea this way. And otherwise again we use it as needed.

Our working procedures have been eased, because it is only necessary to use one product instead of applying various products as we did before.

Our working procedures have been eased by FiberCombi

We conduct a production of antibiotic free pigs and are using the hygiene powder FiberCombi from Destek ApS today. We have been using it since December 2015.

Our experiences with FiberCombi

We really like to work with this product and it doesn't make much dust. It is very good for drying the pens.

Our working procedures have been eased, because it is only necessary to use one product instead of applying various products as we did before.

Application

We apply FiberCombi in the farrowing section just before farrowing, where we spread a handful in the lying area of the piglets.

After farrowing we use it daily to keep the pens dry and to keep a good hygiene until the piglets are one week old. Otherwise we use it as many times as it is necessary.

We also apply FiberCombi especially for litters with diarrhoea as it is very efficient to keep the piglets dry.

Besides that, we also use FiberCombi for weaners, where we spread it in the lying area, just before moving in new pigs, and until about one week after weaning, to keep a good hygiene and to prevent diarrhoea this way. And otherwise again we use it as needed.

Customer service

The service at Destek is top notch. They are good at informing and guiding us and the salesman is good at following up on things.
